Re: Mandatory Water Meter Replacement Project

Dear Homeowner,

Saks Metering has been contracted by the Borough of Ocean Gate to conduct a borough-wide water meter upgrade project. Saks Metering's authorized installers will be working in the community, with photo identification, car signs, and company uniforms. Typically, the upgrade of your water meter should take no more than an hour to complete. In most cases, your water meter is located inside your home, basement, or crawl space. You may experience a temporary water disruption.

Please make an appointment to receive the upgrade by visiting SaksMetering.com and clicking on "Make an Appointment", emailing info@saksmetering.com, or by calling their office at 609-318-8111. Saks Metering looks forward to working with you to accommodate your schedule. Should you have any questions or concerns regarding this project, don't hesitate to contact the Borough or Saks Metering at any time.

If your water meter is located in a crawl space accessible from the outside, please use this as a 48 hour notice to inform you that Saks Metering was given permission by the Borough of Ocean Gate to enter the crawl space and perform the necessary change out. If you wish to be present while this work is performed, please contact Saks Metering within 48 hours of the date of this notice by using any of the communication mentioned above.

We thank you in advance for your cooperation and apologize for any inconvenience.

Regards,

Mayor Paul Kennedy
